Early Years Pupil Premium Funding

2022 - 23

Rationale

The Early Years Pupil Premium is available for children in all Early Years settings who are aged 3 and 4 and who meet the eligibility criteria. The funding rate for the EYPP this year is £342 per child accessing the full 570 hours. This funding is allocated directly to providers as an addition to the hourly rate (Base Rate) being an enhancement of 60p per hour. EYPP is paid on the universal 15 hours only up to a maximum of 570 hours in the year (an eligible pupil attending for 30 hours per week will only receive EYPP for the universal 15 hours' element)

Autumn Term Data 2022	EYPP outperforming at ARA in 6 areas Non EYPP outperforming at ARA in 1 area Area of concern - Literacy

Actions

EYPP Funding has enabled us to identify the needs and interests of our EYPP pupils and to purchase bespoke and personalised resources to support their development, progress and attainment.

Specific areas of concern are discussed, planned for and monitored within the weekly curriculum intent. GS has been recruited to work alongside EYPP boys to further expand provision to support boy's interests and to develop projects targeted towards specific areas of concern. We have expanded our offer for snack provision to include a wider and more substantial range of food, to ensure our children are ready for learning. More individual support is provided to families as and when needed, including breakfast/ lunch club provision or additional sessions. Learning interventions are provided to those who require it, including speech and language support.

Spring Term Data 2023	EYPP outperforming at ARA in 6 areas Non EYPP outperforming at ARA in 1 area Area of concern - Literacy

Actions

We have purchased more resources this term linked to the children's needs and interests to further support their development, progress and attainment. Literacy has been a focus for planning each week this term and phonics planning has been further developed to incorporate specific themes targeting boy's interests. GS spent the term working alongside the EYPP boys in provision. He identified their interests and common play behaviours to develop a project linked to Understanding the World. He helped to support their Communication and Language and PSED during play. We have continued to expand our offer for snack provision to include a wider and more substantial range of food, to ensure our children are ready for learning. Children have further developed their independence and autonomy within the snack bar. More individual support has continued to be provided to families as and when needed, including breakfast/ lunch club provision or additional sessions. Learning interventions have been evaluated and further developed to provide continued support to those who require it, including speech and language support.

Summer Term Data 2023	EYPP outperforming at ARA in 6 areas

	Non EYPP outperforming at ARA in 1 area Area of concern - Literacy

Actions

Again resources were purchased this term which linked to the children's interests and developmental needs to further support their progress and attainment. Literacy has continued to be a focus for planning and 'Twinkl Phonics' has been adapted to include more challenging aspect 6 and 7 activities. Our snack provision has continued to be developed to include a wider and more substantial range food, ensuring our children are ready for learning. Personalised support has continued for those children or families that need it. The percentages of EYPP children assessed as on track have gone up considerably since September in all areas of learning, which shows the impact the funding has had. In Maths an extra 46.3% of EYPP children were on track in July compared with September, which was the highest increase. An extra 39.1% of EYPP children were on track in Literacy which shows the impact of targeting Literacy across the year.
